A QUARTERLY JOURNAL OF GEOPHYSICS

Volume 17 · 1965

Printed in Sweden by

Almqvist & Wiksells Boktryckeri AB · Uppsala 1965

Editor
B. BOLIN
Stockholm
Sweden

Executive Editor
R. MICHAEL SMITH
Stockholm
Sweden

Office of the Editor: Tulegatan 41, Stockholm Va

Contents

Volume 17, 1965

Number 1 — February 1965

Editorial . . . 1

A. Pedersen—Measurements of ion concentrations in the D-region of the ionosphere with a Gerdien condenser rocket probe . . . 2

R. R. Long—On the Boussinesq approximation and its role in the theory of internal waves 46

V. Barcilon—Stability of a non-divergent Ekman layer . . . 53

R. Blandford—Inertial flow in the Gulf Stream . . . 69

G. Veronis—On parametric values and types of representation in wind-driven ocean circulation studies . . . 77

P. Groen—A measure of form difference and its application to the study of turbulent motions . . . 85

G. O. P. Obasi—On the maintenance of the kinetic energy of mean zonal flow in the southern hemisphere . . . 95

St. Pantchev—La corrélation d'espace du géopotentiel du niveau moyen énergétique dans l'atmosphère . . . 106

N. Besleagă, R. Stoian and A. Doneaud—Quantitative forecasting precipitation results obtained by means of three simplified computation methods for vertical velocities from amounts recorded at Bucharest and Cluj . . . 111

E. Eriksson—An account of the major pulses of tritium and their effects in the atmosphere 118

Y. Toba—On the giant sea-salt particles in the atmosphere. I. General Features of the Distribution . . . 131

Number 2 — May 1965

W. Zdunkowski, D. Henderson and J. V. Hales—The influence of haze on infrared radiation measurements detected by space vehicles . . . 147

F. E. Volz—Atmospheric haze layers and brightness of the horizon . . . 166

E. Hessvedt—The ozone distribution over the equator and its dependence on vertical motions . . . 177

R. Berggren—The vertical distribution of ozone over Arosa on 16 April, 1962 and the synoptic situation . . . 180

H. Hänsel—Über eine neue Deutungsmöglichkeit von Terella-Experimenten . . . 194

J. Latham—Electrification produced by the growth of soft hail in thunderclouds . . . 204

R. C. Smith and P. Smith—Theoretical flow pattern of a vortex in the neighbourhood of a solid boundary . . . 213

E. Eliasen and B. Machenhauer—A study of the fluctuations of the atmospheric planetary flow patterns represented by spherical harmonics . . . 220

F. Webster—Measurements of eddy fluxes of momentum in the surface layer of the Gulf Stream . . . 239

A. C. Redfield—The termal regime in salt marsh peat at Barnstable, Massachusetts . . . 246

Corrigendum . . . 260

Number 3 — August 1965

A. Kasahara, E. Isaacson and J. J. Stoker—Numerical studies of frontal motion in the atmosphere-I . . . 261

P. A. Gilman—The mean meridional circulation of the southern hemisphere inferred from momentum and mass balance . . . 277

E. O. Holopainen—On the role of mean meridional circulations in the energy balance of the atmosphere . . . 285
N. A. Phillips—Elementary Rossby Waves . . . 295
J. W. Miles—Instability of very long waves in a zonal flow . . . 302
A. Wiin-Nielsen—On the propagation of gravity waves in a hydrostatic compressible fluid with vertical wind shear . . . 306
E. N. Lorenz—A study of the predictability of a 28-variable atmospheric model . . . 321
V. P. Starr and P. A. Gilman—On the structure and energetics of large scale hydromagnetic disturbances in the solar photosphere . . . 334
E. Hesstvedt—On the spatial distribution of some hydrogen components in the mesophere and lower thermosphere . . . 341
F. Möller—On the backscattering of global radiation by the sky . . . 350
H. R. Plumlee and R. G. Semonin—Cloud droplet collision efficiency in electric fields 356
Y. Toba—On the giant sea-salt particles in the atmosphere. I. Theory of the Vertical Distribution in the 10-m Layer Over the Ocean . . . 364
G. W. Israel—Thoron (Rn-220) measurements in the atmosphere and their application in meteorology . . . 382
D. Ehhalt and K. Knott—Kinetische Isotopentrennung bei der Verdampfung von Wasser 388

Shorter contribution

W. Bischof—Carbon dioxide concentrations in the upper troposphere and lower stratosphere. I . . . 397
L. Y. Nilsson—Gravitional effects on ground-water level . . . 402
Book review by M. H. P. Bott . . . 404
Corrigendum . . . 404

Number 4 November 1965

G. Fischer—On a finite difference scheme for solving the non-linear primitive equations for a barotropic fluid with application to the boundary current problem . . . 405
H. L. Kuo—Further studies of the properties of cellular convection in a conditionally unstable atmosphere . . . 413
D. Ray—Cellular convection with nonisotropic eddys . . . 434
R. Hide—The viscous boundary layer at the free surface of a rotating baroclinic fluid: effects due to the temperature dependence of surface tension . . . 440
Z. Petkovsek and M. Ribaric—On the airflow over mountains with gentle slopes . . . 443
C. W. Newton and Y. Omoto—Energy distribution near jet stream and associated wave-amplitude relations . . . 449
V. P. Starr, J. P. Peixoto and A. R. Crisi—Hemispheric water balance for the IGY . . . 463
A. Nyberg—A computation of the evaporation in Southern Sweden during 1957 . . . 473
B. Eriksson—A climatological study of persistency and probability of precipitation in Sweden 484
E. Eriksson—Deuterium and oxygen-18 in precipitation and other natural waters; some theoretical considerations . . . 498
F. E. Volz—Note on the global variation of stratospheric turbidity since the eruption of Agung Volcano . . . 513
G. B. Hunt—A theoretical study of the changes occurring in the ozonosphere during a total eclipse of the sun . . . 516

Shorter contribution

V. M. Muchnik—On the influence of the electric field upon the processes in thunderstorms 524
R. J. Deland—On the scale analysis of travelling planetary waves . . . 527
Letters to the Editor . . . 529
Book review by Valter Schytt . . . 531
Corrigendum . . . 531
Index . . . 532
